

Cloud complexity slowing down your transformation?

How about unifying cloud, data, AI, and edge into one seamless fabric for effortless scale and faster innovation?

Dear Tech Leader,

It's time to break silos, simplify processes, and trust every outcome.

IndiaT360 presents Tata Communications Vayu Cloud Fabric

UNIFIED | EFFORTLESS | TRUSTED

Solution engineered to accelerate your digital future with agility, security, and complete control.

Built for end-to-end unification, Vayu Cloud Fabric brings together four powerful pillars:

- **Vayu Cloud:** Scalable, secure, hybrid-ready cloud foundation
- **Vayu Data Platform:** Unified and governed data fabric
- **Vayu AI Cloud:** Elastic GPU power for AI workloads
- **Vayu Edge Platform:** Low-latency, intelligent edge capabilities

Why choose a generic cloud when unified intelligence awaits you

- Unified multi-cloud orchestration
- Centralised data fabric with full governance
- Elastic GPU access for AI & analytics adoption
- Edge-ready infrastructure for real-time agility
- Flexible commercial models aligned to enterprise needs
- Built-in security across every layer
- Lifecycle support—from design to continuity

Enterprise-Grade Support You Can Trust

- 24x7x365 managed services
- Global expertise with a proven delivery ecosystem
- SLA-driven ITIL framework
- Secured by design architecture
